

Early College: What It Is

A structured program to support students as they take college courses!

In partnership with Salem State University we are providing a wonderful opportunity for high school students to take college courses sequenced along a career pathway while earning credit for both high school and college.

You will accelerate college degree completion, fulfill requirements for high school while completing college credits and earn credit for courses that most often transfer to 2 and 4 year institutions through MassTransfer.

Early College Course Offerings
